

# SHILOHNEXT™

## Scripto-X™

## SAVE VALUABLE TIME WITH AUTOMATED SSO WRITING.

**ShilohNEXT™ Scripto-X™** speeds up the time-intensive process of recommending quantities and locations for Store Specific Orders (SSOs). Leveraging Shiloh's automated technology, **Scripto-X** needs only a few simple inputs to produce fully-executed SSOs in minutes – reducing human error, boosting operational efficiencies, and delivering accurate, data-driven inventory decisions.

**ORDER**

**PREPARE**

**SHIP**

**SELL**

*With just a few simple inputs, Scripto-X generates your SSO in seconds*

*Fulfillment checks the order and prepares inventory for distribution*

*Inventory is marked for destination and rolled out for delivery*

*Stores receive the exact inventory needed to complete the sales*

With **Scripto-X**, tedious and time-consuming SSO data preparation is finally a thing of the past. Using Shiloh's built-in proprietary logic, **Scripto-X** automates the most difficult steps in SSO writing, making it easier than ever to move your inventory with precision and speed to **maximize your sales every time.**

# SHILOHNEXT™

## QUICK, EFFORTLESS SCRIPT WRITING

**ShilohNEXT™ Scripto-X™** replaces complex, manual Excel-based processes with automated workflows that meet your individual business needs. By leveraging a “Bring Your Own Data” approach, **Scripto-X** drastically reduces implementation time and effort. Simply upload your data set and let our cutting-edge technology do all the heavy lifting – with lightning-fast results.

## Bring Your Own Data (BYOD)

**ShilohNEXT Scripto-X** offers a flexible solution that gives the user full self-service data loading capability. With a simple one step upload directly into the tool, users upload simple data sets and ShilohNEXT prepares the data and processes multiple layers of logic for high-precision analytics, delivering incredibly fast results.

### Key Benefits

- ✓ Eliminate slow, expensive processes
- ✓ Get everyone on board with easy user adoption
- ✓ Reduce human error with clean, validated data
- ✓ Get up and running fast with effortless implementation
- ✓ Process multiple SSOs in minutes

## Allocation Decisions Made Easy

With its one-click handling of multiple allocation methods, **Scripto-X** makes the process of determining inventory quantities and locations quick and effortless. Parameter selections like Quantity Available to Ship, SSO Type, and Allocation Method give users full control over the workflow process – because **more choices equals better results.**

### SSO Types

- Push** *Focused on achieving a specific number of units*
- Pull** *Focused on achieving a specific Weeks of Supply goal*

### Allocation Methods

- Weeks of Supply** *Allocate to reach Weeks of Supply goal. Scripto-X automatically prioritizes stores based on greatest need and sales opportunity*

**Even Spread** *Allocate to all stores based on quantities available to ship. Scripto-X automatically prioritizes stores based on sales opportunity*

**Store Min-Max** *Allocate a specific minimum or maximum quantity to identified stores*

### Automated Allocation Features

- ✓ Automatic Vendor Pack and Warehouse Pack Rounding
- ✓ Stores with no sales automatically removed
- ✓ Omit and send traits applied
- ✓ Reference notes give quick insights into allocation results
- ✓ Automatically consider multiple selling timeframes to determine actual need
- ✓ Flexibility to override or change automated results

## All in One Place

**Scripto-X** is a full-service tool that allows users to bring their own data, process SSO logic in minutes, export the results into any template, and historically archive SSOs – all from a single environment.

### One-Stop Convenience

- ✓ Historical SSOs are saved for easy reference
- ✓ Robust owner and editor security options
- ✓ Export SSOs to Excel for quick use in any template
